LAMPIRAN 1

RINGKASAN TOKSIDROM DAN PEMERIKSAAN KLINIKAL UTAMA

Toxidrome	***Presentation***	***Vital Sign Changes***
Anticholinergic	*Delirium, flushed skin, dilated pupils, urinary retention, decreased bowel sounds, memory loss, seizures*	*Tachycardia* *Hypertension* *Hyperthermia*
Sympathomimetic	*Delusions, paranoia, diaphoresis, piloerection, mydriasis, hyperreflexia, seizures, anxiety*	*Tachycardia* *Hypertension* *Hyperthermia*
Cholinergic	*Confusion, weakness, salivation, lacrimation, defecation, emesis, diaphoresis, muscle fasciculation, seizures, miosis*	*Bradycardia* *Hypothermia* *Tachypnoea*
Opioid	*Altered mental status, miosis, unresponsiveness*	*Shallow respirations* *Bradypnoea* *Bradycardia* *Hypothermia* *Hypotension*
Sedative-hypnotic	*Coma, stupor, confusion, sedation, progressive deterioration of CNS function*	*Apnoea*
